Course: Natural Language Processing

Assignment No 2

Q. No	Questions	Marks
1	<p>Explain the need for Syntactic Analysis. Check whether the sentence "The big bird ate some food in the park." can be derived using the CFG given below.</p> <p>$S \rightarrow NP\ VP$ $NP \rightarrow Det\ N \mid Det\ N\ PP \mid Det\ Adj\ N \mid Det\ Adj\ N\ PP$ $VP \rightarrow V\ NP \mid V\ NP\ PP \mid V\ PP$ $PP \rightarrow P\ NP$ $Det \rightarrow 'the' \mid 'a' \mid 'an' \mid 'some'$ $N \rightarrow 'bird' \mid 'dog' \mid 'park' \mid 'food' \mid 'tree'$ $V \rightarrow 'saw' \mid 'ate' \mid 'walked'$ $P \rightarrow 'in' \mid 'with' \mid 'on' \mid 'for'$ $Adj \rightarrow 'big' \mid 'small' \mid 'green'$</p>	10
2	<p>For the HMM model built on the below sentences,</p> <p>Sentence: "The child plays in the park." Tags: DET NOUN VERB PREP DET NOUN</p> <p>Sentence: "Dogs love to fetch balls." Tags: NOUN VERB PREP VERB NOUN</p> <p>Sentence: "They enjoy reading books." Tags: PRON VERB VERB NOUN</p> <p>Check whether the given sentence is tagged appropriately.</p> <p>Sentence: "The cat sleep on the sofa." Proposed Tags: "DET NOUN VERB PREP DET NOUN"</p>	10
3	<p>What is Syntax Parsing? Check whether the sentence "the big dog gave a treat to the small cat" can be derived using the CFG given below.</p> <p>$S \rightarrow NP\ VP$ $NP \rightarrow Det\ N \mid Det\ N\ PP \mid Det\ Adj\ N$ $VP \rightarrow V\ NP \mid V\ NP\ PP$ $PP \rightarrow P\ NP$ $Det \rightarrow 'the' \mid 'a' \mid 'an'$ $N \rightarrow 'cat' \mid 'dog' \mid 'treat' \mid 'park'$ $V \rightarrow 'gave' \mid 'saw' \mid 'walked'$ $P \rightarrow 'to' \mid 'in' \mid 'with'$ $Adj \rightarrow 'big' \mid 'small'$</p>	10
4	How HMM select an appropriate POS tag for a sentence based	10

	<p>on probability when correctly tagged and incorrectly tagged for the below test data.</p> <p>Test data <s> Will can spot Mary </s> be tagged as -</p> <p>Will as a Model Can as a Verb Spot as a Noun Mary as a Noun Training Corpus</p> <p><s> Mary Jane can see Will </s> <s> Spot will see Mary </s> <s> Will Jane spot Mary </s> <s> Mary will pat Spot </s></p> <p>Note- Mary, Jane, Spot and Will are all names Calculate the probability of this sequence when a) correctly tagged and incorrectly tagged by constructing transition and emission probabilities.</p>	
5	<p>From the sentences given below, what is the probability of generating the text “<i>The dog barks when it sees a stranger</i>”</p> <p>“<i>The dog barks loudly.</i>” “<i>Cats chase mice.</i>” “<i>The sun shines brightly.</i>”</p>	10
6	<p>A person XYZ sitting in a <u>close</u> room and eating ice cream whenever he feels hot. John is another person who <u>are</u> observing how many ice creams XYZ eats per day. Based on this observation John finds the weather condition whether outside is HOT or COLD. State transition diagram and initial probability are given.</p> <p>$\Pi = [0.8, 0.2]$</p> <p>Observable state is given: Day -1 XYZ eats one ice cream, Day-2 XYZ eats 3 ice cream and Day-3 XYZ eats one ice cream. Make a transition probability matrix and Emission probability matrix. Find the probability of <u>sequence</u> of weather as HOT, COLD, HOT in three days.</p>	10

7	<p>A company wants to classify emails as either Spam or Not Spam using Naïve Bayes and based on the following dataset:</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th>Email</th><th>Word "Offer"</th><th>Word "Free"</th><th>Word "Money"</th><th>Spam</th></tr> </thead> <tbody> <tr><td>E1</td><td>Yes</td><td>Yes</td><td>No</td><td>Yes</td></tr> <tr><td>E2</td><td>No</td><td>Yes</td><td>Yes</td><td>Yes</td></tr> <tr><td>E3</td><td>Yes</td><td>No</td><td>Yes</td><td>No</td></tr> <tr><td>E4</td><td>Yes</td><td>Yes</td><td>Yes</td><td>Yes</td></tr> <tr><td>E5</td><td>No</td><td>No</td><td>Yes</td><td>No</td></tr> <tr><td>E6</td><td>Yes</td><td>Yes</td><td>No</td><td>No</td></tr> </tbody> </table> <p>We want to classify a new email (E7) which contains the following words:</p> <ul style="list-style-type: none"> • "Offer": Yes • "Free": Yes • "Money": No 	Email	Word "Offer"	Word "Free"	Word "Money"	Spam	E1	Yes	Yes	No	Yes	E2	No	Yes	Yes	Yes	E3	Yes	No	Yes	No	E4	Yes	Yes	Yes	Yes	E5	No	No	Yes	No	E6	Yes	Yes	No	No	10					
Email	Word "Offer"	Word "Free"	Word "Money"	Spam																																						
E1	Yes	Yes	No	Yes																																						
E2	No	Yes	Yes	Yes																																						
E3	Yes	No	Yes	No																																						
E4	Yes	Yes	Yes	Yes																																						
E5	No	No	Yes	No																																						
E6	Yes	Yes	No	No																																						
8	<p>Training corpus with POS tagging is given below-</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th></th><th>Noun</th><th>Modal Verb</th><th>Verb</th><th>Noun</th></tr> </thead> <tbody> <tr><td>1</td><td>Rohan</td><td>will</td><td>spot</td><td>Will</td></tr> <tr><td></td><td>Noun</td><td>Modal Verb</td><td>Verb</td><td>Noun</td></tr> <tr><td>2</td><td>Will</td><td>can</td><td>pat</td><td>Rohan</td></tr> <tr><td></td><td>Modal Verb</td><td>Noun</td><td>Verb</td><td>Noun</td></tr> <tr><td>3</td><td>Will</td><td>Rohan</td><td>spot</td><td>Seeta</td></tr> <tr><td></td><td>Noun</td><td>Modal Verb</td><td>Verb</td><td>Noun</td></tr> <tr><td>4</td><td>Seeta</td><td>will</td><td>pat</td><td>Spot</td></tr> </tbody> </table> <p>With reference to Hidden Markov Model approach for POS tagging</p> <ol style="list-style-type: none"> i. Construct transition probability table ii. Construct emission probability table <p>Note: Include start and end characters for all the sentences</p>		Noun	Modal Verb	Verb	Noun	1	Rohan	will	spot	Will		Noun	Modal Verb	Verb	Noun	2	Will	can	pat	Rohan		Modal Verb	Noun	Verb	Noun	3	Will	Rohan	spot	Seeta		Noun	Modal Verb	Verb	Noun	4	Seeta	will	pat	Spot	10
	Noun	Modal Verb	Verb	Noun																																						
1	Rohan	will	spot	Will																																						
	Noun	Modal Verb	Verb	Noun																																						
2	Will	can	pat	Rohan																																						
	Modal Verb	Noun	Verb	Noun																																						
3	Will	Rohan	spot	Seeta																																						
	Noun	Modal Verb	Verb	Noun																																						
4	Seeta	will	pat	Spot																																						
9	<p>How HMM select an appropriate POS tag for a sentence based on probability when correctly tagged and incorrectly tagged for the below test data.</p> <p>Test data – <s> Will can spot Mary </s> be tagged as -</p> <p>Will as a Model Can as a Verb Spot as a Noun Mary as a Noun</p> <p>Training Corpus –</p> <p><s> Mary Jane can see Will </s> <s> Spot will see Mary </s> <s> Will Jane spot Mary </s> <s> Mary will pat Spot </s></p> <p>Note- Mary, Jane, Spot and Will are all names</p> <p>Calculate the probability of this sequence when a) correctly tagged and incorrectly tagged by constructing transition and emission probabilities.</p>	10																																								
10	<p>For the HMM model built on the below sentences,</p>	10																																								

	<p>Sentence: "<i>The child plays in the park.</i>" Tags: DET NOUN VERB PREP DET NOUN Sentence: "<i>Dogs love to fetch balls.</i>" Tags: NOUN VERB PREP VERB NOUN Sentence: "<i>They enjoy reading books.</i>" Tags: PRON VERB VERB NOUN</p> <p>Check whether the given sentence is tagged appropriately. Sentence: "The cat sleep on the sofa." Proposed Tags: "DET NOUN VERB PREP DET NOUN"</p>	
11	<p>Differentiate between Pragmatic and Discourse Analysis with examples.</p> <p>Consider the following dialogue:</p> <p>Speaker A: "Can you open the window?"</p> <p>Speaker B: "It's really cold outside."</p> <ul style="list-style-type: none"> ● What pragmatic concept is used in Speaker B's response? ● What is the intended meaning of Speaker B's reply in terms of speech acts? <p>Explain the coherence and cohesion in Discourse Analysis with examples.</p>	10
